

HAMJETH MISREE

SENIOR SOFTWARE ENGINEER

Email: hamjeth68@gmail.com | **Phone:** +94 771157106

LinkedIn: [Hamjeth Misree](#) | **GitHub:** [Hamjeth68](#) |

Portfolio: <https://hamjeth.vercel.app/>

Address: No 40 Kawdana Road, Dehiwala - Mount Lavinia, Sri Lanka

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of progressive experience in full-stack development, mobile applications, and cloud technologies. Demonstrated expertise in React Native, Flutter, Next.js, and microservices architecture with a proven track record of delivering high-impact solutions across fintech, edtech, and enterprise SaaS platforms. Strong background in scaling applications to serve millions of users while maintaining focus on performance optimization and user experience excellence.

PROFESSIONAL EXPERIENCE

PelicanCube PVT Limited

Senior Software Engineer | [ProjectLink](#)

January 2025 - Present

Project: Pravesha - Sri Lanka Railways E-Ticketing Platform

- Leading development of national digital ticketing infrastructure serving millions of users
- Architecting scalable mobile and web solutions with multi-language support and real-time booking
- Implementing secure QR-based e-tickets with PCI-compliant payment processing
- Mentoring development team and establishing best practices for large-scale public systems

Technologies: Reactjs, React-Native, TypeScript, Tailwind CSS,MMKV, React Query + MMKV for offline-first UX, Redux Persist (Persistent state management), NestJS, Redis, PostgreSQL, Docker, NGINX, AWS, EC2, S3, CloudWatch

Sanlabz PVT Limited

Senior Software Engineer

January 2024 - January 2025

Project: ClassVeew - SaaS platform for preschools and kindergartens in Qatar

- Led full-stack development of comprehensive school management system
- Architected scalable solutions with GCP integration for real-time updates and offline-first UX
- Designed intuitive user interfaces for seamless school management operations
- Implemented secure payment gateway, profile management, and attendance tracking features
- Developed comprehensive dashboard for academic progress monitoring and parent communication

Technologies: Reactjs, React-Native, TypeScript, Tailwind CSS,MMKV, React Query + MMKV for offline-first UX, Redux Persist (Persistent state management), NestJS, Redis, PostgreSQL, Docker, NGINX, AWS, EC2, S3, CloudWatch, GCP, GitHub Actions (CI/CD pipeline automation), Firebase App Distribution (QA & beta app delivery), Fastlane (Automated mobile builds and deployment), CommentChat, OpenAI, MicroServices, RabbitMQ, Prisma, TypeORM, GoDaddy, AuthO, Firebase,

Codelantic (Pvt) Limited

Software Engineer

September 2021 - December 2023

Project: SpotonMoney - Global money transfer mobile banking application | [ProjectLink](#)

- Built a cross-platform money transfer solution enabling worldwide remittances from the UK
- Implemented core features: recipient management, Faster Payments integration, transfer tracking
- Designed secure profile management with document upload for AML compliance
- Partnered with global banks to ensure reliable transactions with competitive FX rates
- Developed real-time status updates and encrypted transaction processing

Project: Bankyo Compliance - API-Driven Banking Ecosystem - | [ProjectLink](#)

- Ensured compliance with PSD2/GDPR through secure authentication (OAuth2) and encrypted transactions.
- Developed a customizable banking platform using microservice architecture, enabling businesses to build tailored fintech solutions
- Implemented continuous deployment pipelines for independent service updates (Docker/Kubernetes)
- Integrated cutting-edge technologies to replace legacy banking systems with modular APIs
- Ensured compliance with financial regulations through secure authentication (OAuth2) and encrypted transactions

Project: Namasthe India - E-commerce restaurant management application | [ProjectLink](#)

- Led comprehensive front-end and back-end integration for optimal system performance
- Implemented advanced Redux patterns for complex state management scenarios
- Architected Spring Boot microservices backend with containerized deployment

- Achieved improved reliability and scalability through Docker containerization

Project: RestaurantX - Food Ordering Ecosystem | [ProjectLink](#)

- Created a multi-service platform for food ordering (delivery/pickup/table reservations)
- Integrated payment gateways for online/Cash on Delivery transactions
- Developed real-time order tracking and restaurant-customer communication features
- Optimized UX for both customers and restaurant owners

Project: Trinco Foodie Park - Hospitality Management App | [ProjectLink](#)

- Designed customer-facing app for premium dining experiences with reservation management
- Implemented menu customization and special offers system
- Built admin portal for inventory management and customer analytics
- Integrated payment solutions for seamless transactions

Technologies: Reactjs, React-Native, TypeScript, Tailwind CSS,MMKV, React Query + MMKV for offline-first UX, Redux Persist (Persistent state management), NestJS, Redis, PostgreSQL, Docker, NGINX, AWS, EC2, S3, CloudWatch, GCP, GitHub Actions (CI/CD pipeline automation), Firebase App Distribution (QA & beta app delivery), Fastlane (Automated mobile builds and deployment)

Koombiyo IT

| [ProjectLink](#)

Software Engineer (Intern)

January 2019 - September 2021

Project: KoombiyoDelivery.lk - Large-scale logistics platform serving millions of users monthly

- Contributed to full-stack development of comprehensive package delivery digitization platform
- Implemented React.js frontend with optimized Node.js backend integration
- Developed real-time tracking and notification systems for enhanced user experience
- Participated in scaling solution to handle millions of monthly active users

Project: Ayp.lk - Leading e-commerce marketplace in Sri Lanka | [ProjectLink](#)

- Developed React-based frontend architecture for comprehensive buy-and-sell services
- Enhanced platform functionality and user experience through advanced component design
- Implemented responsive design patterns for optimal mobile and desktop experience
- Contributed to platform serving hundreds of thousands of active users

Technologies: React.js, Node.js, Redux, Firebase, MongoDB, Azure DevOps, REST APIs, Real-time WebSocket, ExpressJs, Twilio Client

TECHNICAL SKILLS

Core Skills: Full-Stack Development, Mobile App Development, System Design, Cloud Architecture, API Development

Frontend: React.js, Next.js, Angular, TypeScript, JavaScript, Redux, HTML5, CSS3, Tailwind CSS

Mobile Development: React Native, Flutter, Android (Java/Kotlin), iOS (Swift/Objective-C), Expo

Backend: Node.js, Spring Boot, ASP.NET, GraphQL, REST APIs, SOAP, WebSocket, Microservices

Databases: MySQL, MongoDB, PostgreSQL, Firebase, Redis

Cloud & DevOps: AWS (EC2, S3, Lambda), GCP, Azure, Docker, Kubernetes, CI/CD, GitHub Actions, Fastlane

Testing & Methodologies: TDD, Agile, E2E Testing, Consumer-Driven Contract Testing, UML

Other: Payment Integration (Stripe), Authentication (STYTCH), Analytics (Segment), Error Monitoring (Sentry)

EDUCATION

BSc (Hons) Computer Science - Specialization in Software Engineering

Kingston University London | 2021

Higher National Diploma in Software Engineering

Pearson Assured, ESoft Metro Campus Colombo 04 | 2019

NOTABLE PROJECTS

Pravesha - Sri Lanka Railways E-Ticketing Platform

- **Scaled** national digital infrastructure to **3M+ monthly passengers** with 99.9% uptime
- **Architected** real-time booking system with QR-based ticketing (**40% faster** than legacy)
- **Reduced payment failures by 65%** through PCI-compliant gateway integration

ClassVeew - School Management SaaS (Qatar)

- **Led development** of all-in-one platform serving **200+ preschools** with 50k+ active users
- **Pioneered offline-first sync** that reduced data loss complaints **by 90%**
- **Integrated** real-time parent-teacher communication (1M+ monthly messages)

Ferry Pay - Hospitality Fintech Platform

- **Transformed** tip management for **500+ venues** with automated tax compliance

- **Engineered** POS integration cutting transaction time **from 45s to 8s**
- **Migrated** core infrastructure to cloud (AWS/GCP), reducing ops costs **by 40%**

SpotonMoney - Global Money Transfer

- **Processed \$50M+** in cross-border transfers with <1hr AML clearance
- **Boosted conversion 30%** via dynamic UI adapting to regional preferences
- **Integrated** 20+ banking partners for direct-to-account settlements

Bankyo Compliance - Modular Banking API Platform

- **Reduced onboarding time** from weeks to hours with customizable API modules
- **Achieved 100% audit compliance** through granular access controls
- **Scaled** to support **15+ fintech startups** with independent service deployments

RestaurantX/Trinco Foodie Park - Hospitality Tech

- **Streamlined operations** for **50+ restaurants** with unified order/reservation system
- **Cut customer support tickets by 60%** via real-time order tracking
- **Increased avg. order value 25%** with upsell-friendly menu design
